

You wish to boost productivity through new technology and reduction of Idle service time?

Your aim to maximize customer satisfaction through efficient service. Searching for a reliable, modern, ordering system for your restaurant?

The Touch Base Ordering System for Restaurants

MSITPL happy to present touch screen based **Restaurant Ordering System (ROS)**.

Restaurant Management has been made so easy to use with ROS for your restaurant. ROS allows restaurant staff to function in methodical manner, and helps the restaurant owner and manager to have seamless end to end operation and achieve highest productivity in all aspect of their restaurant.

In today's competitive world, knowing and managing your business effectively has never been so important. ROS gives all the flexible and easy to use system for your day to day operation giving the management the total control of business. Our system has developed by industry expert and professional who has extensive experience in the field.

How does your restaurant benefit from a ROS?

It allows your service team to better coordinate its effort and places the emphasis back on its clientele. Fast ordering, processing, quick service and happy customers are your key benefits. As a result, your profitability increases from time saved on communication, fewer service trips by staff, greater table turn over, and repeat visits with satisfied customers.
